The S.A.N.E. Vax, Inc. web site provides the latest news on vaccines, including those currently being developed and tested, with links to scientific studies on their potential safety, efficacy and need. Our intent is to cover the vaccine issue on a global scale.

Mission Statement

The Sane Vax Mission is to promote Safe, Affordable, Necessary & Effective vaccines and vaccination practices through education and information. We believe in science-based medicine. Our primary goal is to provide the information necessary for you to make informed decisions regarding your health and well-being. We also provide referrals to helpful resources for those unfortunate enough to have experienced vaccine-related injuries.

Adverse events experienced after HPV vaccines have brought the issue of vaccine safety to the forefront around the world. S.A.N.E. VAX, Inc. is a place to find the answers to questions you may have regarding vaccine safety and efficacy.

Who We Are

Norma Erickson President; is a free-lance writer and independent business consultant dedicated to providing complete information regarding all aspects of the vaccination controversy.

Leslie Carol Botha, Vice President of Public Relations is one of the twenty -first century's most prominent natural cycle thinkers, an author, publisher, and radio talk show host, and internationally recognized expert on hormones and behaviors.

Rosemary Mathis, Vice President of Victim Support; Co-founder of TruthAboutGradasil.org; mother of an HPV vaccine injured daughter. Mathis is determined that each parent has the right to full disclosure of potential side effects of a vaccine prior to their child's vaccination.

Freda Birrell, Secretary. Birrell's mission is to educate people in the UK about the harm HPV vaccines are causing globally She also works to educate politicians as to the need for formal investigations regarding the safety and efficacy of HPV vaccines.

Janny Stokvis, VAERS Research Analyst. Stokvis' mission is to help start an open and honest debate about the risks and benefits of HPV vaccines, to raise awareness that adverse events exist, and help those who are adversely affected get recognition and the right medical treatment.

HPV Vaccine Fact Sheet

- When detected, HPV infection is easily managed and rarely proceeds to cancer
- Very few women with HPV develop cervical cancer
- HPV infections are only one of several risk factors for cervical cancer
- At least 50% of sexually active men and women acquire genital HPV infection at some point in their lives — 90% of the time the virus clears up on its own within two years without incident
- Centers for Disease Control and Prevention (CDC) records show 3,976 women died from cervical cancer in the U.S. in 2006.
- American Cancer Society lists cervical cancer as the 12th leading cause of carcinoma related deaths
- HPV Vaccine efficacy duration is at the maximum 5 to 6 years. Symptoms of girls adversely injured are lasting as long as the vaccine.
- Non cancerous types of HPV: 6 & 11
- Cancerous types: 16, 18, 31, 33, 35, 39, 45, 51, 52, 56, 58, 59, 68, 69, 73, 82
- Pap testing has reduced cervical cancer risk by 74% over the last 40 years

The finding of HPV viral DNA integrated in most cellular genomes of cervical carcinomas supports epidemiologic data linking this agent to cervical cancer however, direct causation has not been demonstrated.

Cervical Cancer Prevention, Health Professional Version
National Cancer Institute (NCI)

If a woman who has been exposed to vaccine-relevant HPV submits to HPV vaccination, her risk of developing precancerous lesions may increase by:

- 44.6% - post Gardasil® Vaccination
- 32.5% - post Cervarix® Vaccination

May 2006 VRBPAC Report -

In the September 2008, FDA Closing Statement on Gardasil it was noted that 73.3% of girls in the clinical trials developed “new medical conditions” post vaccination. 17 girls died during the clinical trials.

September 2008 FDA Closing Statement on Gardasil

Official Letters

August 29, 2011 - The Honorable Margaret A. Hamburg, M.D., Commissioner U. S. Food and Drug Administration (FDA)

Subject: SANE Vax Inc. requests the FDA investigate the extent of the HPV DNA contamination in the Gardasil HPV4 vaccine currently on the market and take appropriate actions to ensure public safety regarding future shipments

August 31, 2011 -Lauri Markowitz, M.D.

Centers for Disease Control and Prevention

Subject: Request for post-HPV vaccination monitoring data

July 26, 2011 - Lauri Markowitz, M.D.

Centers for Disease Control and Prevention

Subject: Request for post-HPV vaccination monitoring data

Mark Schiffman, M.D., M.P.H., Senior Investigator, National Cancer Institute

Subject: HPV Vaccine Accountability

[SANE Vax to Senator Grassley: Congratulations, keep on investigating](#)

November 2, 2010 -The Honorable Margaret Hamburg, M.D., Commissioner, FDA, The Honorable Harold E. Varmus, M.D., Director,NCI

Subject: Request recommending a reliable human papillomavirus (HPV) genotyping test to support the national virology-based cervical cancer prevention program for patient care

October 19, 2010 - The Honorable Margaret A. Hamburg, M.D., Commissioner U. S. Food and Drug Administration (FDA)

Subject: Request that the FDA rescind its approval for Gardasil™ as a vaccine to prevent cervical cancer or to prevent genotype-specific human papillomavirus (HPV) infection due to use of an inappropriate primary endpoint and unreliable HPV genotyping methods for efficacy evaluation

October 19, 2010 - Jack Stapleton, M.D., Chair

Vaccines and Related Biological Products Advisory Committee

SUBJECT: Valid endpoint and reliable HPV genotyping for expanded use proposal of Gardasil™ vaccine
