

Attorney General George Jepsen: 860-827-2620

Email: attorney.general@ct.gov

Dear Mr. Jepsen:

I am contacting you to ask that you take immediate steps to reinstate Dr. Sin Hang Lee as director of the Milford Medical Laboratory, an affiliate of Milford Hospital in Milford, Connecticut, and grant him the resources he needs to continue contamination analysis and testing of the HPV vaccine, Gardasil, and the adverse reactions reported by young women who have been given this vaccine.

Access to these resources by Dr. Lee will allow him to continue his research, test the numerous samples of Gardasil that have already been sent to him for analysis and allow him to complete a report he has been commissioned to submit on his findings with S.A.N.E. Vax Inc., a consumer watchdog organization monitoring patient reaction to the Gardasil vaccine.

I believe anything less than full reinstatement of Dr. Lee's former status will effectively deprive medical consumers around the world of information critical to their ability to make an informed choice with respect to HPV vaccinations.

Sincerely,
